TRAVEL TO/FROM THE LAGAN AND LOUGH CYCLE WAY

The Northern Ireland Railways network serves the cycle route throughout its length. Central Station lies on the route whilst Lisburn and Jordanstown stations are within a few minutes cycle ride from either end. Many stations in between are only a short cycle ride or walk away from the route on quiet roads or traffic-free paths. Facilities exist for the carrying of up to four bicycles on trains except before 9:30 am Monday to Friday.

The Lagan and Lough Cycle Way
A 21 mile, mostly traffic-free cycle and walking route linking Lisburn, Belfast and Newtownabbey

www.sustrans.org.uk

The award-winning Lagan and Lough Cycle Way is a twenty-one mile, level, mostly traffic-free cycle ride or walk connecting Lisburn, Belfast and Newtownabbey. The route is suitable for novice and family cyclists of all ages and abilities and passes along the waterside environment of the Lagan Towpath and Belfast Lough. It can be split easily into shorter sections by the use of trains, which carry cycles and there are stations along the route. The Lagan and Lough Cycle Way is a section of the National Cycle Network, a comprehensive network of safe and attractive routes to cycle and walk throughout the UK, linking to routes in the Republic of Ireland. One third of the Network is traffic-free, the rest follows quiet lanes or traffic-calmed roads. It is delivered through partnerships with Government Departments, Local Councils and community groups and is co-ordinated by the charity Sustrans, www.sustrans.co.uk
**ATTRACTIONS ALONG THE ROUTE**

**Union Locks and Lisburn**
Union Locks lie off the Blaris Road near Sprucefield where National Route 9 heads to Moira and beyond. This site contained a boathouse, a carpenter's workshop, a lock-keepers house, stables and the canal manager's house. The route continues along the towpath and Union Bridge into Lisburn and Lagan Valley Island. Situated between the River Lagan and a restored section of the Lagan Canal, it is built of white Portland Stone and is the home of Lisburn City Council. It holds the Council Offices, an arts centre, theatre and public restaurant. In addition, there are many art pieces throughout the site. The route rejoins the towpath after crossing the Millennium and Jubilee bridges.

**Lagan Valley Regional Park**
From Union Locks the cycle way passes through 11 miles of the Lagan Valley Regional Park to Stranmillis near Belfast. The Park not only includes the River Lagan and the popular towpath, but also a number of public parks, the National Trust property at Minnowburn and the historic Giant's Ring archaeological site. A walk or cycle through this section of the park will undoubtedly yield some of the varied flora and fauna to be found in this beautiful and tranquil area.

**Belfast's Laganside Area**
This area has undergone tremendous change in recent years, providing Belfast with attractive riverside pathways and a vibrant waterfront. Its traffic-free paths provide people with the opportunity to enjoy views, away from the bustling city centre, over the River Lagan, Belfast City Council's spectacular Waterfront Hall and the Odyssey complex. Links across the river enable walkers and cyclists to admire the Belfast Hills and the City Centre landscape from the eastern river bank and Comber Greenway.

**Belfast's Dockland Area**
From the Lagan Weir at Donegall Quay north to Dargan Road, Belfast's working docks are adjacent to the route. The docks have a variety of uses from passenger terminals to timber and grain docks, demonstrating that Belfast is still an important international port. Across the Victoria Channel can be seen the remnants of the Harland and Wolff shipyard with the two yellow cranes named Samson and Goliath. Here is the birthplace of many great liners such as the Titanic and Canberra.

**Belfast Lough to Jordanstown**
After leaving the dockland area, the route continues along the North Foreshore Path beside Belfast Lough. The path gives cyclists and walkers the chance to observe the varied bird life, while on the move or at one of the bird observation points built especially on advice from the RSPB. Macedon Point, close to Hazelbank Park, is the perfect place to stop and take in a great view of the Lough, Cave Hill and the distant County Down coast. The park also offers seating, picnic tables, play areas and public amenities. Leaving Hazelbank the route continues to Whiteabbey Village, which offers a great opportunity to stop off for refreshments or a bite to eat. The route ends at the Loughshore Park overlooking Belfast Lough, within a stones throw of Jordanstown University.

**Sculpture and Public Art Trails**
Alongside much of the route, pieces of sculpture encourage cyclists and walkers to stop and admire the creativity of local artists. Highlights include the four different styles of National Cycle Network Mileposts which give directions and distances, the Big Fish at Donegall Quay in Belfast and Concentric Twist straddling the towpath at Lisburn.
